DESCRIPTION

Every time you switch on a light, start up a computer or turn on a television, you do it because of discoveries related to the work of Michael Faraday.

In a swimming pool you will be guarded from disease because of liquid chlorine in the water: this is because Michael Faraday first liquefied chlorine. Faraday built the very first electric motor and later the first generator and transformer of electricity.

Faraday believed that his great purpose in life was to read, as he put it, "the book of nature ... written by the finger of God". Few people in history have read that book more accurately and applied it more helpfully.

AUTHOR

Derick Bingham was the teaching pastor at Christchurch, Belfast. He was also an Adjunct Professor of English Literature at the John Brown University and a Fellow of the Royal Society for Arts. A popular author and well known public speaker Derick passed away on the 6th of March 2010 following a long battle with Leukemia.

ENDORSEMENTS

This book is an incredible narrative that tells the story of someone who undertook several efforts to improve the science, especially the electromagnetism. It shows that everything is possible when we decide to be deep followers of Jesus Christ.

Pedro Costa, Rio de Janeiro, Brazil
